Traditional music of the near east is finding a revival for modern instrumentalists. There are three major challenges that need to be overcome for western-trained musicians to be able to perform this style. This workshop will start by modifying everyone's horn by extending a valve with vinyl tubing, so our instruments can produce the 24 note quartertone chromatic scale. Next, we will learn traditional scales of the region, or "Maqam", to be familiar with the tonal style. Finally, we will learn various ornaments that are used in the music. Bring your horn, it will be fun!
