Ensemble Auditions
Flute and Piccolo
Fall 2021

Please prepare the following flute excerpts. Consult recordings, full orchestral scores (many of which are on IMSLP) and Jeanne Baxtresser’s Orchestral Excerpts book for suggested tempos, phrase markings and understanding of style. Sight-reading may also be a component of this audition.

I have attached a guide, “Fundamentals of Practicing Excerpts”, to help with your preparation.

Flute:
1. Dvorak—Symphony No. 8, Op. 88, IV. Allegro ma non troppo, rehearsal C through rehearsal E (with all repeats)
2. Beethoven—Symphony No. 4 in Bb Major, II.: Adagio, pick-ups to rehearsal E (m. 64) to m. 72
3. Saint-Saëns—Carnival of the Animals, No. 10—Volière (all)

Piccolo
Prokofiev—Lieutenant Kijé, I. The Birth of Kijé: 5th measure of rehearsal 1 to rehearsal 3

All are encouraged to audition on the following piccolo excerpts but only those auditioning for Wind Ensemble and Orchestra are required to prepare them:
Fundamentals of Practicing Excerpts

Always use a recording device to examine the following categories listed below. The recorder doesn't have to be expensive- I use the voice memo app on my iphone! Other options are, garage band app on a mac, audacity (free download), a zoom recorder etc. Listen to each category objectively and separately from its counterparts.

Rhythm- Having the metronome on isn't the same as playing with the metronome
- Practice with different subdivisions eventually relying upon yourself for the smaller divisions
- Record yourself playing with and without the metronome. Are you playing exactly with the pulse?
- Play with the metronome on the off-beats or on the measure

Practice Suggestion: Use a metronome during warm-ups while practicing sound or intonation, not just during scales or excerpts. This way, a precise sense of rhythm is developed outside of technical and rhythmical exercises.

Intonation- Learn to use your ears rather than your eyes to determine pitch
- Practice with a drone using different pitches to tune perfect intervals within the excerpt.
- When playing solo, pitch is determined by the relationships of your intervals, hear the distance between two succeeding notes.
- Know pitch tendencies of the flute. What notes are inherently sharp/flat on instrument?

Practice Suggestion: Using a tuner, be able to hit the "green dot" or center of each pitch at any dynamic, articulation or register.

Articulation- Can you hear the articulation? Does the articulation match the style?
- Easy to forget this aspect of a musical phrase
- Experiment with different shades of articulation, which do you like and why?

Practice Suggestion: Use only a diaphragmatic attack or no attack at all. Never get stuck in a rut, switch up how you hear the music so that it is new and fresh every time.

Vibrato- Does the vibrato serve the phrase? When does it stick out of the musical line?
- Use audacity or another recording program to SEE your vibrato. Is it always the same?
- -- Never let vibrato become habitual. Use great intent with how you choose to shade a note with vibrato

Practice Suggestion: Experiment with different combinations of amplitude (height or
pitch variance) and frequency (speed). Get creative!

**Phrasing**—Using words, describe your musical intent. Mark in phrases—Where is the climax? How does the phrase build momentum? What tools do you have to achieve your musical ideas?

- Write in character words for each measure, how does it function?
- Assign colors, numbers or sounds to each note within a phrase.
- What is the shape or contour of the phrase

**Adverse training:** Create adverse circumstance for yourself, simulating nerves, different temperature, dry mouth, sweaty or cold hands, racing heartbeat etc.
